

Managed Router Service

Providing the knowledge and expertise of NYSERNet engineers

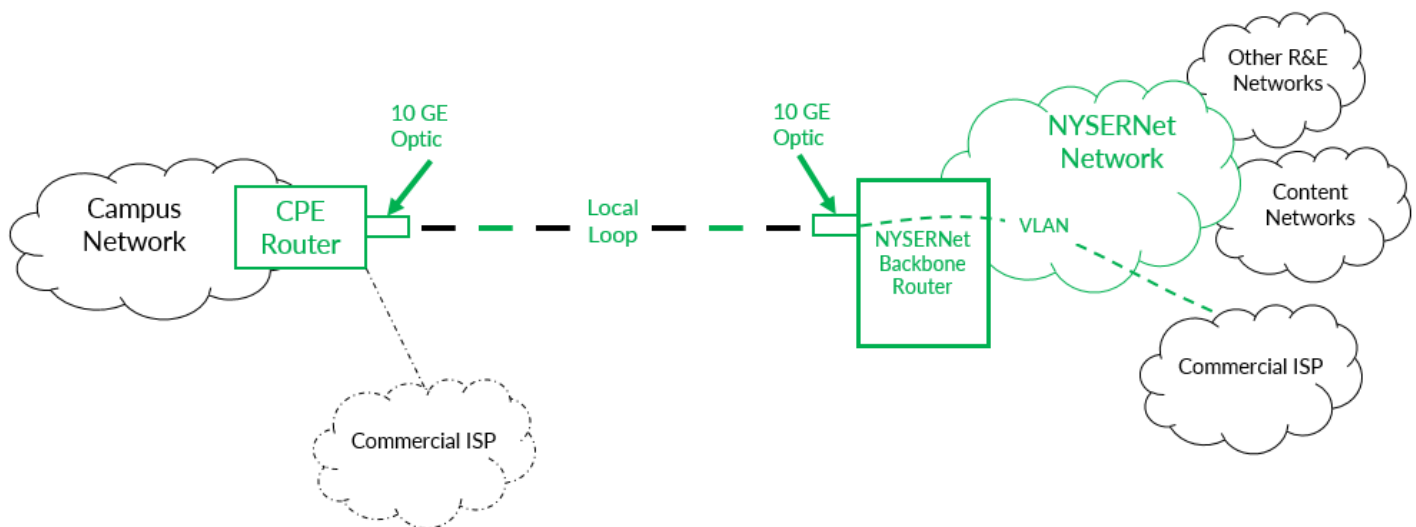

Managed Router Service is an ancillary offering that provides an experienced NYSERNet Engineer to maintain your campus Integrated Access Service (IAS) connections. If you're concerned about adding more work to your staff, the Managed Router Service solves this problem. NYSERNet's experienced engineers will install, manage and maintain your IAS connections for you.

For more information, contact membership@nysernet.org or visit our website, www.nysernet.org/mrs

The Managed Router Service takes the burden off network staff by having NYSERNet engineers maintain your Integrated Access Service connection.

Have experienced engineers manage and maintain your IAS connections

Any institution that has Integrated Access Service (IAS) with NYSERNet is eligible to participate in this service. The Managed Router Service includes installation of a 10 Gb capable router, plus all the management, maintenance and configuration support necessary to maintain the multiple external connections enabled by your institution's IAS connection.
